

CARE & MAINTENANCE

Composite Decking

Looking after your composite decking

While composite decking is designed to be highly durable and requires less maintenance compared to traditional wood decking, it's important to note that it is not entirely scratch-resistant. To help ensure your decking remains in great condition for as long as possible, here are some care and maintenance tips:

- **Regular Cleaning:** Sweep the decking regularly to remove dirt and debris. For deeper cleaning, use a mild detergent mixed with water and a soft-bristle brush.
- **Avoid Harsh Chemicals:** Refrain from using harsh chemicals or solvents, as they can damage the surface of the decking.
- **Protect from Scratches:** Place protective pads under furniture and grill legs to prevent scratches. Be cautious when moving heavy objects across the decking.
- **Manage Stains Promptly:** Address spills and stains as soon as they occur to prevent them from setting. For stubborn stains, a mixture of water and mild detergent usually does the trick.
- **Use a Decking Cleaner:** Occasionally, use a cleaner specifically designed for composite decking to maintain its appearance and performance.

By following these tips, you can help preserve the beauty and longevity of your composite decking.

If you have any questions at any time, we are more than happy to help.
